

SPECIFICATIONS FOR:

1 LITRE 1A1 TINPLATE DRUM

CODE:347

1A1/X/250/**

FOR PACKING GROUPS:
I II III

External Dimensions:
100 x 170mm

** Denotes year of manufacture

NOTES:

This high quality tinplate drum conforms to **U.N.** regulations, and is capable of withstanding **250Kpa** (37 psi, 2.5 bar) pressure rating.

Internally plain, the cone-shape head and narrow neck give easy pouring characteristics.

The 30mm screwcap closure has an aluminium-faced wad, with a tinplate neck seal for added security.

This drum may be used free-standing and is ideally suited for Class 3 Flammable Liquids such as gasoline, solvents and paint-related substances. Other liquids in Group I, II & III may be transported.

A wide range of Combination Packagings for the transportation of Dangerous Goods are available.

Further details on request
