SPECIALIST PACKAGING SOLUTIONS
FOR THE TRANSPORT OF
DANGEROUS GOODS
BY AIR, SEA AND ROAD
airseadg.com
Air Sea Containers Limited offers a flexible range of dangerous goods packaging solutions and supporting expertise, to assist our customers in choosing the right packing solutions, ensuring compliance with international law, for safe and cost effective dispatch of dangerous goods worldwide.

Choosing the right UN approved dangerous goods packaging can be complex.

That’s why we’ve developed the Air Sea website to help you easily select the right combinations of packaging for your needs. What’s more, our Technical Sales team are equipped with the skills and expertise to help you choose the right solution every time.

We understand that you might often need small amounts of packaging. There is no minimum order quantities across our extensive range of over 700 packaging solutions.

In 1946 Staniford and Gaskell founded Staniford Drums, supplying wooden barrels to the soap and detergent industry. The business prospered and went on to supply re-conditioned steel drums to the oil industry and were requested to design smaller packaging for samples being shipped from rigs to land. As a result Air Sea Containers Ltd was formed in 1981 to specifically deal with these kind of requests and went on to develop our extensive range of UN approved packaging.

Today, Air Sea Containers Ltd is a leading provider of high quality packaging solutions offering a premium worldwide service to almost every industry and sector, from food and drink manufacture to medical research.

INTERNATIONAL LAW ON THE TRANSPORT OF DANGEROUS GOODS.

The United Nations (UN) Subcommittee of Experts on the Transport of Dangerous Goods develops recommended procedures for the transport of all types of dangerous goods by air, sea and land.

- The International Civil Aviation Organisation (ICAO) has used the UN recommendations to develop regulations for the safe transport of dangerous goods by air.
- International Maritime Organisation for dangerous goods by sea.
- ADR/RID regulatory guides for transporting dangerous goods by road and rail. These regulations have been adopted by countries and their enforcement authorities worldwide.
FLEXIBLE SOLUTIONS

We are proud to supply organisations across the globe with a wide offering of packaging solutions. Our customers range from multi-nationals to small businesses worldwide.

No challenge is too large or small for Air Sea Containers Limited:

- Free expert guidance and product support
- No minimum order, next day delivery
- Speedy custom made packaging development

Highly knowledgeable and have at every stage of our demands met us with constructive advice, guidance and service. The final product received is above expectations and has been expertly managed to ensure we are fully compliant with UN regulations but also hold an attractive product. Pleasure to work with and very meticulous.

LIMITED QUANTITIES

Sometimes, when shipping smaller quantities of dangerous goods, limited quantities solutions can be used without the need for UN approved packaging. We can provide labels, complete solutions and advice.

DO YOU THINK YOU ARE SHIPPING LIMITED QUANTITIES?
Ask us for advice

• Custom made packages made to exact requirements
• Complete tests and reports as required
• Kitting solutions
• Quick and efficient turnaround
CUSTOM MADE PACKAGES

We offer custom made packaging development services, using a collaborative approach with our customers to design, test and produce packaging solutions to meet your unique requirements and delight your customers.

CUSTOM MADE PACKAGING SOLUTIONS:

- Reduce overall shipping costs
- Deliver made to measure packaging for your storage needs
- Tested and certified for approved use
- Include pre-printed labels saving you time and money
- Produced in ‘ready to go’ packaging kits
- In house and third party validation testing

PREVIOUS CUSTOM MADE DESIGNS INCLUDE:

- Specially designed UN approved packaging
- Limited quantity packaging
- Overpacks
- Lithium battery boxes
- Custom made packaging kits
- Temperature controlled solutions

UN Packaging Solutions are independently tested and approved.

OUR PRODUCTS

Our UN approved packaging solutions are no ordinary containers. Every product has undergone a series of rigorous tests and must meet strict specifications before they are approved for use. What’s more, tests are carried out on every improvement and enhancement to our products.

SOME OF THE UN DANGEROUS GOODS PACKAGING TESTS ARE LISTED BELOW:

- Drop Tests - Our packaging has to survive drop testing from anywhere between 1.2m and 9.0m
- Stack Tests - Packaging simulation testing is conducted to replicate transport conditions
- Puncture Tests - Specifically for infectious substances which undergo more rigorous testing
- Hydraulic Tests - Conducted on packaging designed to withstand pressure
- Rainfall Simulation Tests - When packaging becomes wet it should be capable of withstanding rainfall

INNER PACKAGING

Our inner packaging solutions may be used where approved as part of a combination with our 4G outer packaging or in some cases as single packaging. Inner packaging is also compatible with the 4GV and 4DV outer packaging solutions.

With a choice of glass, plastic, aluminium or tinplate our range provides flexibility to suit your specific shipping requirements.

PRODUCT OVERVIEW:

- Majority approved for use with our 4G range
- Durable high quality construction
- Range of closure types
- Available from stock, no minimum order

LET US HELP YOU CHOOSE THE RIGHT COMBINATION

Our website matches the correct inner and outer packaging, helping you choose the right combination.

www.airseadg.com
**ALUMINIUM**
Capacity 60ml to 6.2 litres

**GLASS**
Capacity 10ml to 4.5 litres

**PLASTIC**
Capacity 50ml to 10 litres

**TINPLATE**
Capacity 200ml to 5 litres
Goods were received in perfect condition, and we were very happy with them as well as your kind and prompt handling of our order.

UN APPROVED SINGLE PACKAGING

FIBREBOARD DRUMS

Ideal for powders and solids, our UN approved 1G fibreboard drum range provide an extremely tough, reusable and stackable packaging solution.

PRODUCT OVERVIEW:

• Capacity range: 47 to 147 litres
• Durable, high quality construction
• Available from stock, no minimum order
PLASTIC DRUMS

Our UN approved 1H1, 1H2 and 3H1 plastic drums are both durable and reusable, providing an ideal value for money solution to your shipping needs.

PRODUCT OVERVIEW:

- Choice of openings and closure options
- Durable and rigid construction
- Stack or store inside or outdoors
STEEL DRUMS

We have a wide range of UN approved steel drums to accommodate many different substances in high quality and robust packaging solutions.

PRODUCT OVERVIEW:

- Capacity range: 1 litre to 210 litres
- Plain, lacquered or stainless steel finishes
- Composite drums for aggressively corrosive liquids
STEEL JERRICANS

Our UN approved non removable head steel jerricans offer resilience and flexibility with optional combination packaging solutions.

PRODUCT OVERVIEW:

- Capacity range: 0.25 ml to 5 litres
- Ideal for small quantities and samples
- Available from stock, no minimum order
We offer a range of packaging solutions for Class 6.2 Infectious Substance Category A (UN2900/UN2814) and Biological Substance, Category B (UN3373).

From 50ml to 4 litres, we offer combination packaging with or without thermal control, high performance secondary packaging and accessories. All of our products are available as kits with full assembly instructions, visit our website to see what items are included and options available.

PRODUCT OVERVIEW:

- Simple to assemble
- Refurbishment options
- Long life storage capabilities
- Thermal Control with UN Certification

PRODUCT SPECIFICATION:

- Capacity: 50ml to 4 litres
- For substances requiring packing instruction 620 or 650
- UN2900 and UN2814 approved packaging
- Water resistant
- Cold conditioning to -18 degrees
- Category A - Drop tested to 9 metres

Maintaining controlled temperatures throughout transportation can be complex and challenging. That’s why Air Sea Containers has developed a range of packaging solutions to maintain controlled conditions for a wide range of external ambient climates.

PRODUCT OVERVIEW:

- Excellent temperature loss rate performance
- Wide range of dry ice shippers off the shelf
- Complete kits with full instructions

FLEXIBLE PACKAGING RANGE:

- Qualified shippers: ISO Shipper and Shipper XP
- Thermal control overpack units
- Specimen carriers

COMPLETE YOUR PACKAGING WITH:

- Cool packs
- Gel packs
- Labels

Need help with THERMAL CONTROL SOLUTION?
Contact us and we can help you
QUALIFIED SHIPPERS

Temperature Controlled Packaging, suitable for shipping substances between 2°C to 8°C for up to 72 hours, the ISO Shipper and ISO Shipper XP systems are independently validated to ISO 9001 quality standards.

THERMAL CONTROL UNITS

Polystyrene overpacks suitable for use with dry ice or cool packs. Dry ice loss rates qualified using external ambient of 30°C.

COOL PACKS & GEL PACKS

For refurbishment of qualified shipping systems or for use within customised solutions.
Transporting lithium batteries can be complex, that’s why Air Sea Containers has designed a range to simplify the packaging process offering safer shipping solutions.

PRODUCT OVERVIEW:

- Ship up to 12kg with a range of box sizes
- UN Compliant Packaging
- Custom kit options, short lead times

COMPLETE YOUR PACKAGING:

- Anti-static bubble wrap
- Anti-static liner bags
- Hazard labels

Ask us about our CUSTOM MADE SOLUTIONS
We make shipping compliance simple with our comprehensive range of packaging accessories including regulatory guides, forms, packaging accessories and labels.
